- HTML and CSS in depth by META, COURSERA
- Linguaskill Business, Cambridge University Press & Assessment English
- Problem solving through programming in C, NPTEL
- Product and brand management, NPTEL
- Usability Engineering, NPTEL

Project

- Yebsys:** Designed and developed the website www.yebsys.com using WordPress, incorporating dynamic features, responsive design, and user-friendly navigation to effectively showcase innovative business solutions and services.
url: <https://yebsys.com/>
- Creatifusion Studios:** Developed a professional website for a digital media studio using WordPress. Focused on responsive design and SEO optimization to increase visibility.
url: <https://creatifusionstudios.com/>
- Wolfram Groups:** Developed the Wolfram Group website using WordPress, customizing themes and integrating plugins for SEO, analytics, and contact forms. This project taught me to design responsive layouts, optimize performance, and create a user-friendly site for showcasing multiple services.
url: <http://wolframgroup.com/>
- Farmer-Consumer Order Management System:** Developed this project during Gen-Brainiacs Hackathon'25. A full-stack web application that bridges the gap between farmers and consumers, allowing farmers to manage orders and receive feedback while consumers can place orders and track delivery status. This system enhances local trade, transparency, and digital interaction between food producers and end-users.
